Potentially one of the most conflictual region of contemporary international politics, Indian Ocean is of great significance and interest in terms of geopolitical and geo strategic study.

The book highlights different countries and issues that plague the region. The articles have analysed at length India with her eponymous and strategic claim over Indian Ocean, the relation among the littorals, cooperative institutional mechanism that has developed in the region and the China factor. The book provides informed perspectives which have immense relevance to Foreign Policy, Maritime security and International Relations.
